INCOMPLETE SURVEYS
 Depths are in metres and are referred to Chart Datum, which is approximately the level of Lowest Astronomical Tide.
 Heights are in metres. Underlined figures are spring heights above Chart Datum. All other heights are above Mean High Water Springs.
 Positions are referred to F. J. (1985) Datum.
Projection: Transverse Mercator
 Spheroid: The spheroid used, date and name of the International services used in compiling the chart are shown in the Sounding Data Diagram.
 Depths in upright figures are from other, smaller scale surveys. The soundings in inverted figures are from the Fiji Department of Lands and Survey, March 1985 and Extension of Chinese Survey, Maps 1984 1979. Additional data from air photographs, 1977-1980.

INCOMPLETE SURVEYS
 Depths in upright figures of the areas in the chart are from other, smaller scale surveys. The soundings in inverted figures are from the Fiji Department of Lands and Survey, March 1985 and Extension of Chinese Survey, Maps 1984 1979. Additional data from air photographs, 1977-1980.

SATELLITE DERIVED POSITIONS
 Positions obtained from satellite navigation systems are normally referred to WGS 84 Datum, but positions may be referred directly to the chart.

CHART 1:50,000 POSITIONS
 1.5 m depth and the sounding are 1:50,000 chart 1:50,000 datum, positions refer to the datum of the chart.

REMARKS
 Canals should be marked when sounding positions are shown. Areas in which soundings are shown in inverted figures should be marked as such. Inverted figures should be marked as such. Inverted figures should be marked as such.

REMARKS
 Remarks are shown in upright and other figures and may refer to soundings in upright or inverted figures.

Tidal Levels referred to Datum of Soundings			
Phase	LT	SPM	Height in metres above datum
High	12:12	1.0	1.4
Low	18:12	0.7	0.3

Top Dive Sites to include in your Waidroka Dive Adventure

SHARK DIVE: "The Most Diverse & Energized Shark Diving Experience in the World!" Up to 8 different species of sharks, including **Black- & Whitetips, Silvertips, Bulls, Grey Reef, Lemon, Nurse and Tiger SHARKS.....**

Local Coral Coast Dive-Sites:

Aquarium: Fantastic place to see Nudibranchs and Flat Worms. Look to the blue for a chance sighting of something larger passing by. This hard coral site provides a nice garden for Turtles.

Mata Point: A pelagic paradise with schools of Barracuda, Trevally, White Tip Reef Sharks and more. Cruise along this steep drop off looking out into the blue for whatever might be passing. Above the drop off is a garden of colourful hard corals where a number of Turtles are often sighted.

Tukini & Serua Wall: This wall dive contains a series of hidden caverns waiting to be explored. Enjoy the great sea fans and hard coral reef life that is densely packed along the wall. The site offers a good chance of close encounters with White Tip Reef Sharks along with green and Hawksbill Turtles.

Twilight Zone: For the more experienced diver. Rather than the coral reef structure that is typical to the area, this site offers a drift through volcanic formations leading down to a deep sandy valley with the possibility of schools of Barracuda, Eagle Rays, Stingrays, Leopard Sharks, Guitar Sharks, White Tip Reef Sharks, Grey Reef Sharks, and Turtles.

Beqa Lagoon Dive-Sites:

Frigates Walls: Big pinnacles coated in schools of purple Anthias. Spectacular swim-throughs. Amazing walls covered in soft coral, home to Moray Eels, Octopus, and assorted critters. White Tip Reef Sharks sleeping on sandy bottom and Grey Reef Sharks cruising. Turtles up near the surface and occasionally a ray or larger shark can be seen cruising by.

Ponti's Playground: Maze of colourful corals coating large Bommies folding out off a steep drop off. White Tip Reef Sharks resting on the bottom and potentially a leopard shark. The sides of the Bommies are home to Moray Eels, Nudibranchs, and a whole host of fish life over the top of the coral heads. Hard Coral gardens sloping towards the shallows.

TASU II Wreck: Deliberately sunk in 1994, TASU II was a 200 ton Taiwanese fishing vessel. Upright, on a sandy bottom, surrounded by garden eels, in about 80FT of water next to Yanuca Island. A well protected spot. Provides shelter to many reef fish and juveniles. Sponges and corals are starting to encrust her and every passing year she becomes more and more beautiful in her mantle of living reef. She offers a good chance to see Pipefish and Whip Coral Shrimp.

Fantasea: An aptly named site – a most enlightening display of soft corals and anemones completely cover this stunning lone pinnacle creating a rainbow of colour. An undercut ledge is home to an array of massive Gorgonians while the pinnacle is home to Blue Ribbon Eels, Blue Dragons and Mantis Shrimps. Exploring this site makes it clear why Cousteau labelled Fiji as the 'soft coral capital of the world'.

Side Streets: A beautiful dive site consisting of dozens of coral heads covered in life – almost too much to take in on 10 dives – let alone 1. Spectacular blend of hard and soft corals mixed with huge and plenty Gorgonians in vivid colours of reds, yellows, purples and pinks, this site is a photographer's dream. Canyons and gorgeous swim-throughs harbor giant black coral bushes and sea whips. Multitude of fish life from Emperor Angel fish to White Tip Reef Sharks.

Golden Arch: A series of coral Bommies with a massive archway covered in vibrant soft corals which lead to a swim through. Rocky pinnacles encrusted with fans and black coral bushes – this is a glorious dive with plenty of colour. Reef Sharks, Barracuda & large schools of fish are often sighted here.

Caesars' Rock: A series of spectacular coral heads riddled with tunnels and caverns. Covered in soft corals of every imaginable colour! Huge Gorgonians and black coral bushes ensure great opportunities for the photographer. Schools of small bait fish mingle with Batfish and the chance to see Blue Ribbon Eels. A stunning dive site.

The above are just some of our recommendations for your Waidroka Dive Adventure in Fiji, whilst there are an unlimited number of sites, including Discovery Dives anywhere along the vast reef line of the Beqa Lagoon, topped off by Deep Water Pinnacle 'Cakau Lekaleka' (24 miles to sea), which if conditions are right is just the cream on top!

Come Dive with us in FIJI at Waidroka Bay Resort!
